

K-Love Radio is a vital FM station in my area. Already, I have been able to help several people obtain clean and wholesome FM stations for their young children and inspiring music for depressed individuals. K-Love is already difficult to receive in some parts of town and inside buildings. To lower the frequency emissions even more to provide for LPFM stations would be unfair and discriminatory. The service provided by K-Love is a valuable one and in the best interest of the public who responds to the messages provided by this LISTENER SUPPORTED radio station. While the LPFM backers may feel that there is "little value" in our station, we obviously do not feel that way as our contributions continue to support this and similar stations.
